Cognitive Psychology
Master's Thesis: The Subjective Sense of Familiarity with Music
- B.S.** **May 2017**
Maryville College – Maryville, TN
Major: Neuroscience (Psychology Track)
Undergraduate Thesis: The Effects of White Noise on the Encoding and Retrieval Processes of Working Memory in People with ADHD
GPA: 3.98/4.00
Major GPA: 3.97/4.00
Honors: Summa cum laude

Research and Work Experience

- Research and Evaluation Assistant** **June 2019 – February 2020**
Research Evaluation Consulting
- Processed and analyzed quantitative and qualitative data using SPSS and Excel
 - Developed key themes from qualitative data using a Grounded Theory Approach
 - Conducted literature reviews, which entailed annotating articles and providing summary of findings reports
 - Collaborated with team members in developing evaluation reports, focusing on communicating results to clients with actionable recommendations
 - Survey development and implementation in SurveyMonkey
- Graduate Researcher** **August 2017 – Present**
Cleary Memory Lab
Colorado State University
- Designed and programed experiments examining recognition memory, focusing on déjà vu, tip-of-the-tongue states, and feature processing
 - Programs included E-Prime, PsychoPy, and Qualtrics
 - Processed and analyzed data using R Studio, IBM SPSS, and JASP
 - Developed and published manuscripts on experimental findings
 - Performed lab manager responsibilities, such as hiring undergraduate research assistants, coordinating lab schedule, and managing 12-14 undergraduate research assistants
- Study Coordinator** **July 2016 – June 2017**
Cole Neuroscience Center
University of Tennessee Medical Center
- Assisted Randy Trudell, M.D., and Shelley Lott, N.P., in a study investigating methods for testing cognitive impairment in individuals suffering from Multiple Sclerosis
 - Administered neuropsychological testing to study participants
 - Testing included the Montreal Cognitive Assessment (MoCA), Brief Repeatable Battery of Neuropsychological Assessments (BRB), and Beck Depression Inventory II (BDI-II)
 - Administered neuropsychological testing as standard of care to neurology clinic outpatients
 - Testing included the Mini-Mental State Examination (MMSE), Geriatric Depression Scale (GDS), MoCA, BDI-II, and COGselftest
 - Collaborated with faculty across departments for research needs and inquiries
 - Managed a participant information database in compliance with hospital standards

Research Assistant**June 2016 – September 2016***Integrative Healthcare*

University of Tennessee Medical Center Cancer Institute

- Recruited cancer patients in-person and by telephone
- Administered surveys assessing quality of life and cancer treatment outcomes
 - Coordinated phlebotomy appointments to assess levels of cytokines
- Worked in collaboration with team members to improve study retention

Program Drug Addiction Counselor/Student Intern**January 2016 – May 2016***Centerpointe*

Helen Ross McNabb Center

- Organized and facilitated group education classes for clients
- Administered one-on-one counselling
- Completed progress notes on clients, assessing daily behaviors and input during group classes
- Made follow-up calls with discharged clients, inquiring about their current progress
